

Cook County High Education Tips for SEESAW

What students need to know to be successful!

GREEN MEANS GO!

SeeSaw is very icon heavy, which makes it great for our youngest students! It also relies on color to inform students what to do next. The best advice is to always look for the green. If you see a green icon in SeeSaw, that means GO, or advance to the next step.

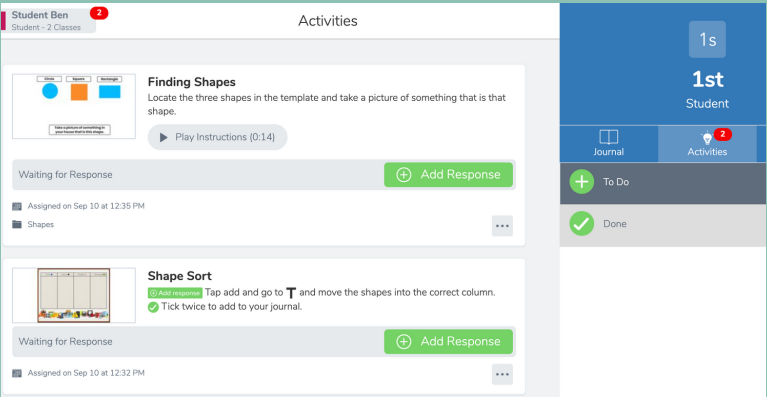

YOUR STUDENT'S JOURNAL

Your student will see their work in their Journal. The journal is where all completed work is housed. It is a collection of all the student has done throughout the class. This will be a great area to watch the progress of your student's learning throughout the year! .

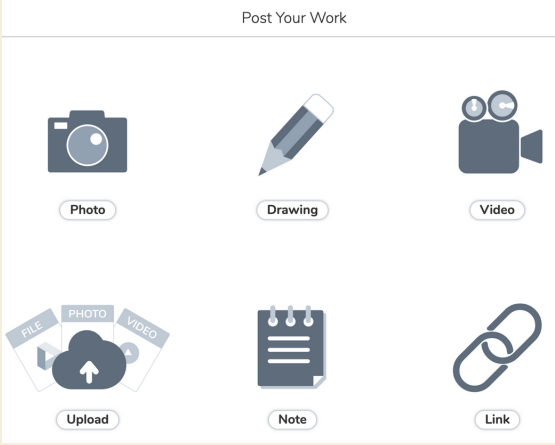

RESPONDING TO AN ACTIVITY

The Activities section is where teachers will post assignments for the student to complete. Students will be able to see the instructions for the assignment and a template (if the teacher created one). The completed activities then show up in the student's journal!

LOTS OF RESPONSE OPTIONS!

Students have many different ways to post their work! You can choose from a photo, a drawing canvas, taking a video, uploading from another platform, writing text in a note, or adding a link!

ADD DIFFERNT ELEMENTS TO YOUR WORK

If students are adding a photo or drawing the will have the same editing tools available. For example, students can add text, audio, additional images/video, and shapes to their work before they submit it!
